

TEWODROS BIRHANU

Full-Stack Software Developer · React · React Native · Next.js · Node.js · TypeScript

onesamket@gmail.com · +251 91 803 9771 · Addis Ababa, Ethiopia · onesmaket.com · github.com/onesamket · linkedin.com/in/ln-onesamket · t.me/onesamket

Results-driven Full-Stack Software Developer and founder with 4+ years of experience designing and shipping scalable web, mobile, and desktop products. Currently building Siket, an AI-powered productivity workspace, while delivering enterprise frontend work in React, Next.js, TypeScript, and the TanStack ecosystem. Comfortable owning a product end-to-end — architecture, API design, AI integration, cloud deployment, and performance — and collaborating across remote, cross-functional teams. Active open-source contributor with 7+ end-to-end projects shipped to production.

PROFESSIONAL EXPERIENCE

Founder & Product Engineer

Nov 2025 – Present

Siket · Self-employed · Addis Ababa, Ethiopia (On-site)

- Founded Siket, an AI-powered productivity workspace unifying tasks, notes, bookmarks, calendar, email, and browser tools — including Siket Workspaces, a calm project-management hub with imports from Linear, Jira, Asana, and Shortcut.
- Own product strategy, UX design, full-stack development, infrastructure, and go-to-market execution as sole founder.
- Built and maintain the browser extension, web application, backend services, authentication, and AI-powered features from the ground up.
- Drive user feedback loops, feature prioritization, growth initiatives, and day-to-day platform operations.

Frontend Developer

Feb 2026 – May 2026

Joveo · Full-time · Remote

- Developed and maintained high-performance frontend interfaces for a global recruitment marketing platform serving enterprise clients.
- Built reusable React and TypeScript component libraries using TanStack Router and TanStack Query, improving development speed and UI consistency across product teams.
- Implemented responsive, accessible web dashboards integrated with REST APIs, enabling real-time job distribution analytics and reporting.
- Contributed to AWS deployment pipelines (S3, CloudFront) for frontend hosting and CDN optimization within an Agile, cross-functional team.

AI Trainer

Feb 2026 – Apr 2026

Revelo · Contract · Remote

- Evaluated and annotated AI-generated code outputs to improve model accuracy and alignment with real-world software engineering standards.
- Provided expert feedback on TypeScript, React, and Node.js code quality, logic correctness, and best practices to refine LLM training datasets.
- Identified edge cases and failure modes in AI responses, contributing to measurably safer and more reliable model behavior.

Frontend Developer

Sep 2024 – Feb 2026

Hineni · Full-time · Remote

- Architected and delivered a full-featured web platform with a strong focus on seamless UX, scalability, performance, and maintainability using React, Tailwind CSS, and TypeScript.
- Implemented SEO best practices and Core Web Vitals optimizations, achieving high Lighthouse performance scores and improved page load speed.
- Built dynamic client-side routing and layout management using TanStack Router for scalable, type-safe navigation.
- Integrated React PDF for generating, rendering, and exporting interactive PDF documents within the application.
- Developed real-time communication features using WebRTC, enabling low-latency audio/video streaming and peer-to-peer interactions.
- Integrated video conferencing via Jitsi, Video SDK, and 100ms (HMS), supporting scalable group calls, webinars, and real-time collaboration.
- Worked with third-party SDKs and APIs for authentication, analytics, payments, and cloud storage; created reusable, responsive UI components with optimized state management.

Frontend Developer

May 2023 – Feb 2026

Robotech Technology · Part-time · Addis Ababa, Ethiopia (Hybrid)

- Led development of cross-platform mobile applications using React Native, delivering polished iOS and Android experiences.
- Built and optimized internal web dashboards using Next.js and TypeScript, reducing page load times and improving team productivity.

- Designed e-commerce frontend flows including product listing, cart, checkout, and order tracking with seamless UX.
- Established frontend architecture patterns and code review standards adopted across the engineering team.

React Native Developer

Aug 2024 – Jan 2025

Prophecious Technologies · Freelance · Remote

- Built and maintained full-stack cross-platform applications using React Native for iOS and Android with Node.js backend services, focusing on performance, scalability, and smooth UX.
- Worked with Prisma ORM and Supabase for backend data modeling, authentication, real-time features, and storage solutions.
- Deployed and managed applications using Vercel, leveraging serverless functions and CI/CD workflows for fast, reliable releases.
- Collaborated with design and backend teams on RESTful API integrations, offline capabilities, and push notification systems; built internal tooling that reduced manual QA time.

KEY PROJECTS

Orthodox Mezmur & Podcast Platform — Full-Stack Developer

- Built a secure, scalable backend powering user management, audio streaming APIs, album/hymn modules, and admin CMS using Node.js and PostgreSQL.
- Developed the frontend with Next.js and Tailwind CSS, delivering a seamless content browsing and playback experience for end users.
- Designed RESTful APIs serving high-concurrency audio content delivery and integrated Supabase for auth and real-time features.

Geez Number Converter — Open Source Library

- Published a type-safe TypeScript library for bidirectional Arabic–Geez numeral conversion, used by Ethiopian developers.

YouTube Clone — Full-Stack Web App

- Built a feature-complete YouTube clone with Next.js, Tailwind CSS, and shadcn/ui, demonstrating advanced React patterns and API integration.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES2022+), TypeScript, HTML5, CSS3, SQL

Frontend & Mobile: React, Next.js, React Native, Expo, Remix, TanStack Router/Query/Table/Form, Tailwind CSS, shadcn/ui, Apollo Client

Backend & APIs: Node.js, Express.js, NestJS, Encore.ts, REST, GraphQL, Apollo Server, WebRTC, Socket.io

Databases & ORM: PostgreSQL, MongoDB, Prisma ORM, Supabase

Cloud & Deployment: AWS (S3, CloudFront), Supabase, Vercel, Railway, Render, Docker

AI & Developer Tools: Claude (incl. Claude Code), ChatGPT, Cursor, GitHub Copilot, v0 by Vercel, Bolt, Lovable, Windsurf, Perplexity — proficient in AI-assisted development, prompt engineering, and building AI-powered product features

Tools & Version Control: Git, GitHub, GitHub Actions (CI/CD), Linux, Nginx

EDUCATION

Bachelor of Science in Information Technology

2020 – 2024

Haramaya University · Haramaya, Ethiopia

Self-Directed Engineering Development

2021 – Present

Online Platforms (Udemy, freeCodeCamp, dev.to)

- Regular author on dev.to (onesamket_dev) covering TypeScript, React, and open-source tooling.

ACHIEVEMENTS & INTERESTS

- Founded and independently built Siket, an AI-powered productivity workspace, from concept to shipped product.
- Delivered 7+ production-grade, cross-platform applications spanning web, mobile, and desktop.
- Maintainer of open-source npm libraries with active community adoption.
- Active contributor to the open-source ecosystem with repositories on GitHub (github.com/onesamket).
- Stays current with emerging technologies through technical writing, reading, and community engagement.

LANGUAGES
